

iMIS¹⁵ wvFileUpload for Web View Users

Does your staff need a full featured process to upload documents for web viewing?

wvFileUpload is part of the wvSuite, a set of iParts created by RSM McGladrey to allow your staff to use the standard iMIS¹⁵ browser web view to perform daily functions.

In many organizations, staff need to create, upload and attach a document to a record as part of their normal job. wvFileUpload allows your casual and full users to view, add and edit uploads via the web view.

Date Uploaded	Category	Attachment Type	Effective Year	Description	Uploaded File
2/25/2010 12:00:00 AM	FDV	FDV.U01400	2010	This is the 2010 Chapter Capital Campaign Plan	Test File Upload.docx

wvFileUpload Features are:

- Uses standard iMIS¹⁵ Activities to provide fields available for upload information.
- Allows creation and edit of uploads by users.
- Allows documents to be viewed after upload.
- Provides user defined categorization of uploads
- Provides types of attachments within each category.

wvFileUpload allows you to empower your users with the ability to use the browser based view of iMIS¹⁵ and still create and edit uploads.

NOTE: wvFileUpload requires WCM

Other iParts currently in the wvSuite include:

wvRelationships, wvMulti-Instance, and wvActivity.
