

iMIS¹⁵ wvRelationships for Web View Users

wvRelationships provides the information of the Relationship Module to web view users.

wvRelationships is part of the wvSuite, a set of iParts created by RSM McGladrey to allow your staff to use the standard iMIS¹⁵ browser web view to perform daily functions.

Many organizations use the Relationship Module to provide more information about affiliations between records to their staff. wvRelationships allows your casual and full users to view, add, delete and edit relationships via the web view, just like the desktop version of iMIS¹⁵.

Type	Target ID	Name	Company	Target Type	Status	Title	Eff Date	Thru Date
GDPDC	10389		Best Buy	GDPDC	A		7/11/2010 12:00:00 AM	7/10/2011 12:00:00 AM
KCPC	14040		New York Tri-State Area	KCPC	A		8/1/2010 12:00:00 AM	7/31/2011 12:00:00 AM

wvRelationships Features are:

- Uses standard iMIS¹⁵ settings
- Uses standard iMIS¹⁵ field configuration
- Allows view, create, delete or edit
- Allows Reciprocal value to default to configuration setting or to be overwritten
- Allows sorting of list of relationships

wvRelationships allows you to empower your staff with the ability to use the browser based view of iMIS¹⁵ and still create, delete and edit Relationships as they would in iMIS¹⁵ desktop.

NOTE: wvRelationships requires WCM and the Relationship module to be purchased for iMIS¹⁵.

Other iParts currently in the wvSuite include: wvActivity, wvMulti-Instance, and wvFileUpload.
