

## Do your staff or public users need a full featured process to upload documents for web viewing?

RSM US LLP

wvFileUpload is part of the wvSuite, a set of iParts created by RSM US LLP to allow your staff to use the standard **iMIS<sup>15</sup>** browser web view or the **RiSE** platform to perform daily functions.

In many organizations, users need to create, upload and attach a document to a record as part of their normal job. For other organizations, it is important to allow users to upload collateral in order to provide information. wvFileUpload allows your users to view, add and edit uploads via the web.

### wvFileUpload Features:

- Uses standard **iMIS** Activities to provide fields available for upload information.
- Allows creation and edit of uploads by users.
- Allows documents to be viewed after upload.
- Provides user defined categorization of uploads
- Provides types of attachments within each category.

wvFileUpload allows you to empower your users with the ability to use the browser based view of **iMIS<sup>15</sup>** or the **RiSE** platform to create and edit uploads.

Other iParts currently in the wvSuite include: wvRelationships, wvMulti-Instance, and wvActivity.

To learn more about RSM US, the wvFileUpload product or the rest of the wvSuite, contact Brenda Barnhart at 1.312.462.6757, at [Brenda.Barnhart@rsmus.com](mailto:Brenda.Barnhart@rsmus.com), or your Authorized **iMIS** Solution Provider for additional information.
